

BONAPARTE SCORES POE AMENDMENT

Secretary of Navy Speaks at Hyattsville.

HARD RAPS AT DEMOCRATS

Charges That Proposed Disfranchisement Act Is New Scheme of the "Ring."

Secretary of the Navy Charles J. Bonaparte was the principal speaker at an enthusiastic rally of the Republicans of Prince George county held last night at the Masonic Temple at Hyattsville, Md. The other speakers were Brainard H. Warner, of this city, and W. Griffith Hall, of Baltimore.

Secretary Bonaparte was introduced by Chairman Frank B. Metzger. The Secretary in his address scored the Poe amendment as the most corrupt that had ever been devised in Maryland politics, and its makers as unworthy citizens.

An Ostracism Measure.

"The Poe amendment," said the Secretary, "is a measure which is being pushed down and entirely out of sight on next Tuesday will, like the automobile, leave a bad smell on the garments of those who have handled it. This measure was devised to put the State of Maryland in the power of the most corrupt, unscrupulous ring known to the annals of her political history. The question remains then, will you turn over this fair State to this ring that they may own it part and parcel, or will you defeat this Poe amendment and let the State remain the property of the people?"

Respects to the Ring.

"Could it be possible," continued Secretary Bonaparte, "that supervisors of elections selected by such a ring, as provided by the Poe amendment, would discharge the duties of their office without partiality or prejudice. Certainly no man's intelligence could be so deluded as to believe that dishonest ring politicians would select supervisors of elections who were themselves honest or could not be controlled by the ring. These supervisors of elections might take oath to discharge the duties of their office without partiality or prejudice, but the ones we have already experienced who were put into office by the Democratic party have been men who have so long disregarded the sacred meaning of their oath that they have long since forgotten the purpose for which it is taken."

"Make the vote against this measure so decisive," said Secretary Bonaparte, "that no amount of corruption or ballot box stuffing will avail these ringsters anything. Let the voice of the people of Maryland be heard in crying down this Poe amendment, so that it will never be heard from again."

Brainard H. Warner followed Secretary Bonaparte with a short speech, in which he dealt principally with the political issues and called upon the voters of Prince George county to support the Republican ticket. Capt. Leonard D. Wildman, who has charge of the wireless section of the Alaskan telegraph system, also spoke.

AMERICA'S COMMERCE WITH PARAGUAY IS GOOD

Interior of Country Is Recovering From "Great War," According to Agent Hutchinson.

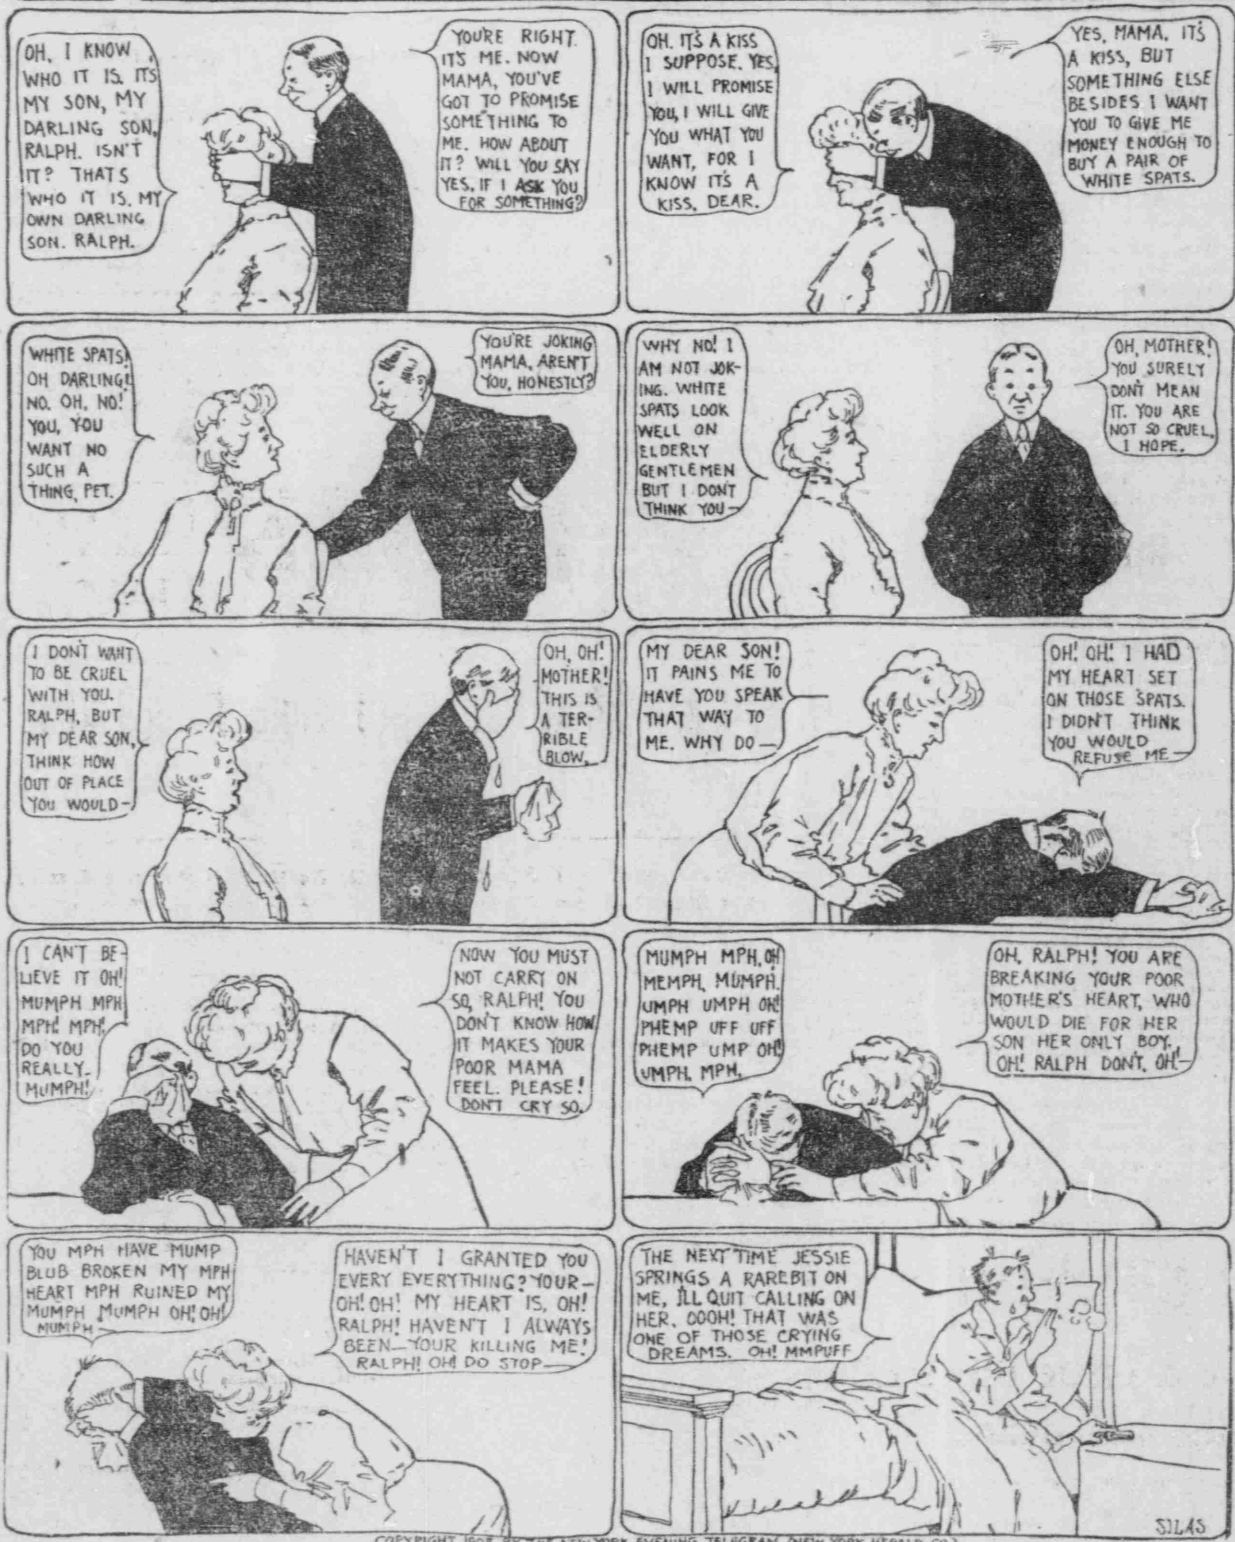

Special Agent Hutchinson, whose reports on trade relations between this country and South America have attracted wide attention, has just sent to Washington a review of industrial and commercial conditions in Paraguay.

This interior country, he says, has almost recovered from the "great war" ending in 1870, when the country was left almost denuded of its male population.

The United States, while securing a small share of the import trade, has had the most success with iron and steel manufactured goods. Some cotton products are imported.

The United States has found it difficult to compete with European countries in this line.

DREAM OF THE RAREBIT FIEND

Army Puts Wireless Into Everyday Use

General Greely Reports Alaskan System Is Doing Large Regular Commercial Business—Rapid and Accurate.

In the annual report on the work of the signal corps of the army the chief signal officer, Gen. A. W. Greely, praises the "professional skill and exceptional ability" of Capt. Leonard D. Wildman, who has charge of the wireless section of the Alaskan telegraph system.

General Greely says it "is the only long wireless system in the world that is regularly operated as a part of a regular telegraph system, handling commercial business."

This line has handled more than a million words in the year across the 107 miles between Fort St. Michael and Safety. As many as 2,000 words an hour have been transmitted at times without error or repetition.

Benefit to Business.

General Greely regards the entire Alaskan system, aggregating 4,000 miles of cable, land and wireless telegraph lines, as not only of the greatest military importance from a strategic standpoint, but of almost incalculable value commercially. Its use has already

resulted in great benefit to the business interests of Alaska.

During the year 134,530 messages were handled, both Government and commercial. For the latter \$78,000 was collected in tariffs.

Corps Well Equipped.

Speaking of the general efficiency of the corps, General Greely says: "At an hour's notice the signal corps can furnish field trains capable of installing and operating lines of communication to the extent of 1,000 miles. Special attention has been paid to the rapid development of lines of information as illustrated in the military maneuvers of Europe during the South African conflict and the Russo-Japanese war."

According to the report, the signal corps has an enlisted force of 1,200 men.

FAINTS AT FUNERAL.

BELLEFOONTE, Ohio, Nov. 1.—While Mrs. Mary Collins was attending a funeral at Union Chapel church she was overcome by the heat and fainted. When she regained consciousness her watch and chain were missing.

STRICKEN WHILE OPERATING.

CHICAGO, Nov. 1.—While performing a serious operation Dr. J. W. Oswald, forty-two years old, was stricken with paralysis, the knife falling from his hand. Another surgeon completed the operation.

If You Suffer

From Germ Troubles, Please Learn What Liquezone Can Do.

Thousands who were sick—like you, perhaps—are well today because of Liquezone. Many had doctored long. Many were discouraged because other treatments had failed. In, they were treating germ diseases with remedies which do not kill germs.

We offered to buy them a bottle of Liquezone—just as we offer you. They did with it what other remedies failed to accomplish. And those countless others—scattered everywhere—are now telling others what Liquezone has done.

Kills Disease Germs.

Contact with Liquezone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquezone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poisons when taken internally. That is why medicine has been so helpless in a germ disease. Liquezone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

The virtues of Liquezone are derived solely from gases. They are generated from the best producers of oxygen, sulphur dioxide, and other germicidal gases. The process of making requires large apparatus, and from 8 to 14 days' time. The object is to so fix the gases, and to combine them, as to carry into the system a powerful tonic-germicide. We purchased the American rights to Liquezone after thousands of tests had been made with it. Its power had been proved, again and again, in the most

difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 1,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Liquezone has done.

But so many others need it that this offer is published still. In the last few years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—that Liquezone can do.

Where It Applies.

These are the diseases in which Liquezone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison
Bowel Troubles
Coughs—Colds
Consumption
Contagious Diseases
Cancer—Catarrh
Dysentery—Diarrhea
Dyspepsia—Dandruff
Eczema—Erysipelas
Fever—Gall Stones
Gout—Gout
Gonorrhea—Gleet
Hay Fever—Influenza
La Grippe
Leucorrhea
Malaria—Neuralgia
Piles—Quinsy
Rheumatism
Scrofula—Syphilis
Skin Diseases
Tuberculosis
Tumors—Ulcers
Throat Troubles

Also most forms of the following:
Kidney Troubles
Liver Troubles
Stomach Troubles
Women's Diseases
Fever, inflammation, or catarrh—impure or poisoned blood—usually indicate a germ attack.

In nervous debility Liquezone acts as a vitalizer, accomplishing remarkable results.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you; to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Liquezone costs 50c and \$1.

CUT OUT THIS COUPON

Fill it out and mail it to The Liquezone Company, 438-464 Wabash Ave., Chicago.

My disease is.....

I have never tried Liquezone, but if you will supply me a 50c bottle free I will take it.

THINK THEY HAVE "NEWPORT PIRATE"

Boston Police Take Young Man Into Custody.

JEWELS IN HIS POCKETS

Denies He Is One Wanted—Admits Cruising Long Island Sound.

BOSTON, Mass., Nov. 1.—By the arrest of a young man giving the name of Frank Green, of 305 East Twentieth street, New York city, who had about him \$1,000 worth of jewelry, some of which is believed to have been stolen, the Boston police believe they have captured H. A. Jackson, the so-called "Pirate King of Newport."

He is about twenty years old and clean cut and pleasant looking. So strongly do the Boston officers think that Green is Jackson that they will endeavor to have "Otto Steiffel," of New York, who was recently arrested because he is believed to be Jackson's "pal," come to identify the Boston captive.

The young man arrested firmly denies that he is Jackson. For two days the inspectors have known that this young man was about the city with his pockets full of jewelry, but did not find him until this forenoon. Chief Inspector Watts on Sunday received a quiet tip that the alleged leader of the pirate gang was somewhere in Boston. The tip came from New York, with a full description.

Among the booty found on the prisoner were articles that have been described in the police manila as having been stolen.

When Chief Watts and Captain Dugan interviewed the prisoner he said that a man met him on the street in New York a few days ago and made him a present of the articles found on him. He has been in Boston only since yesterday. He admits that he spent the summer yachting at Cranston, Newport and other Rhode Island resorts, but denies that he has had any connection with the notorious "pirate sloop." More recently he has been in Maine.

Among the more valuable of the articles found on him were the following: Diamond brooch, with twelve diamonds, valued at \$500; gold medallion brooch, with a cameo head on front, valued at \$300; gold brooch, with seven pearls, valued at \$50; stickpin, with ruby surrounded by eleven chip diamonds, valued at \$50; a black onyx locket, with glass front, valued at \$25; pair of old-fashioned earrings, with pendants set with pearls, valued at \$50.

The New York police will be communicated with to obtain a more complete identity of the man who was commander of the boat.

EDMONSTON'S—Home of the original "FOOT FORM" Boots for Men, Women, and Children.

"Wear Well" Boots for Women

\$3.50 Value, for
\$3.00

Women who seek style, women who crave foot-comfort, and women who demand durability will realize every requirement in our famous "WEAR WELL" BOOTS.
